

BETTER, FASTER AND
MORE PRODUCTIVE
ALL-SEASON

PRE-PLANT, PLANT AND EMERGENCE

Know Today

Evaluate seed, inputs and equipment performance.

Predict outcomes sooner and with better accuracy.

Improve in-season management decisions.

IN-SEASON PRODUCTION

Maximize Potential

Analyze crop health at field edge.

Identify and locate weeds and management issues.

Apply inputs with precision.

Validate treatment effectiveness.

Act before issues are visible to the naked eye.

LATE SEASON & HARVEST

Finish Strong

Determine late-season nitrogen needs.

Evaluate harvest readiness.

Identify harvest order.

OFF-SEASON

Grounded Precision

Create drainage and land-leveling plans and practices.

Design subsurface drainage.

Build variable rate prescriptions.

Evaluate equipment operation and practices.

PRE-PLANT, PLANT AND EMERGENCE

Rx, scouting, chemistry selections, herbicide reduction

IN-SEASON PRODUCTION

Rx, canopy closure, lodging detection, residue management

Late season standard yield estimation

LATE & OFF-SEASON

Dry-down, harvest order, yield regions

Equipment selection, soil nutrition, water management

“When you get above the crop and get a map of the whole field, that really gives you a full view of what’s going on. From there, you can go out to the problem areas and diagnose the problem—whether it’s to do with seed, water or disease.”

Nate Dorsey, Agronomist,
RDO Equipment

Real-time data unlocks valuable insights at the field edge. Data can be integrated into precision agriculture analytics platforms and is accessible with smartphones, tablets and laptops.

1

Go beyond what you can see with the naked eye. With FieldAgent™ Mobile, highlight where you want to fly, set parameters for autonomous flight and press launch.

2

After your drone lands, import images into FieldAgent™. Crop health maps are available in 30-90 seconds. Additional analytics are available too.

3

Share data with trusted advisors and get their feedback. You can also share and sync data with all leading digital ag platforms.

4

FieldAgent™ produces highly precise, easy-to-interpret plant health data in real time. It’s never been easier to make timely, informed in-field decisions.
